More about me.

Why me?

I am motivated and clever.
I adapt fast and am good at planning to make sure I stay on track.
I love to solve problems and come up with creative solutions.
That also makes me good at risk assessments as I love to poke holes and fix them.
I thrive being places where I can always learn more.
I'm a good team worker and also great at solving problems by myself.

Who am I?

I am a half **french** half **danish**
26 years old fullstack developer currently studying **computer sciences** on my 4th semester, at KEA. I speak **multiple languages**, I **draw**, I **code**, I am **curious** and above all I **love to learn new things**. I want to further educate myself in the **cyber-security** field. I love to know and understand everything to the core, that gives me the ability to always **push myself to learn more and more**.

What do I want?

I am looking for a **10-weeks unpaid internship** for my 5th semester of computer sciences at KEA. I would like to work in the **cyber security** sector.

Start: 4-25 aug. 25

What do I like?

- Coding
- Fixing bugs
- Hacking my own code
- Learning
- Graphic design
- Illustration
- Typography
- Reading
- Playing video games
- Playing with my daughter
- Boxing
